RECRUITMENT PROCESS

We follow a stringent selection process with background checks, fingerprinting, and police verification so that the very best secure your business.

Training

A security guard is hired to protect people or property. Security guards act as a preliminary defence system, prior to police involvement, and are a vital part of the safety of our country's schools, hospitals, public places, businesses, etc. Since most security guards in this country work in public places (such as airports, malls, hospitals, businesses, etc.), guards need to be thoroughly trained in public relations relating to all kinds of people and how to identify and handle possible terrorist activity. During security training courses these topics are also covered to ensure that security personnel can recognize weapons, threats, and suspicious activity.

Documentation of events is another important aspect of the security guard position. Training will cover these important practices as well as tactics on how to question and recognize suspicious activity. All of these items are condensed into a short amount of time i.e. 100 hours of classroom training spread across 15 days and 60 hours of training on the job/site spread across 5 days.

We provide regular customized training (basic & refresher training) to ensure upgradation of skill-sets of front line staff. There is a 3 Tier Training Program consisting of:

- Basic Guarding Training
- Industry specific Training
- Site specific Training

There is a comprehensive On-the-Job (OJT) Training calendar being enforced across all units.
